

## Delivers High Definition entertainment and guest-centric hotel service portals

*InfoValue SuiteTV™ is a turnkey IPTV solution that empowers hoteliers to deliver High Definition TV programming, Barker channels, and VOD services to their guests. SuiteTV also enables hoteliers to establish customized, attractive High Definition hotel service portals to effectively interact with their guests to service all their needs while increasing the hotels' revenue and branding.*

SuiteTV delivers digital TV programming with Electronic Program Guide (EPG), and enables Time-Shift TV (TSTV) channels and Network Personal Video Recording (nPVR) to increase personalized time-shift viewing flexibility. SuiteTV allows guests to watch videos from broad selections of feature-length movies, fitness, concerts and independent films at their convenience. Guests can enjoy digital entertainment with perfect picture quality and fully interactive controls, such as fast forward, fast rewind, pause, and bookmark.

SuiteTV enables the easiest, fastest leap forward for delivering compelling services that generate new revenues, increase occupancy rates, and simultaneously reduce operational

expenses. SuiteTV integrates with hotel Property Management Systems (PMS) and guest relations management systems to interactively provide personalized information and services to guests. Once guests have experienced the quality and functionality of SuiteTV, you can be assured that they will return. In addition to guaranteeing guest satisfaction, hoteliers can directly deliver targeted marketing, ads, and promotions.

SuiteTV works seamlessly with the industry leading InfoValue IPTV platform to ensure 24x7 reliability, comprehensive manageability, and unlimited scalability and extensibility for future expansions.
