

# Custom Configuration Services (CCS)

Advanced Media Technologies' Custom Configuration Services put you steps ahead with your new product installation. CCS provides peace of mind knowing that your equipment has been professionally tested & configured by AMT's trained technical staff. With our knowledge of the equipment and its various configurations, we offer a fast turnaround and a zero defects approach. This saves you valuable time and money by helping you quickly implement your new product and avoid frustrating install issues. While you may only deploy this equipment once or twice, we handle it often and have the vendor relationships in place to make sure we're successful so that you're successful.

The four top benefits for using Custom Configuration Services are:

- Equipment is bench checked to validate proper function, firmware level, and to screen for out-of-box failure.
- Equipment is custom configured for your site needs making it as plug and play as possible.
- Equipment is labeled & documented for easy identification allowing for quicker installation.
- Equipment is inspected for proper contents including accessories, manuals, and packaging.

**Maximize Infrastructure Investment, Enhance Customer Satisfaction, Reduce Operating Costs, and Protect Your Business with AMT Services.**
