ACCESSORIES

A WIDE RANGE OF ACCESSORIES TO COMPLEMENT THE AMINO STB RANGE AT DEPLOYMENT OR FOR REFURBISHMENT AND SPARES.

SET-TOP BOX ACCESSORIES

Amino offers a wide range of accessories that can be ordered as 'in-the-box' customer configurations or as after sales upgrades and spares, or for refurbishment. These include:

Remote Controls (RC)

Amino set-top boxes (STBs) can be specified with either a simple STB RC that controls the STB or a Universal RC that controls the STB + TV.

(see parts list overleaf)

Power supplies

Product and country specific power supplies are available for the entire STB range.

(see parts list overleaf)

Infrared extenders

The infrared receiver on Amino STBs can be extended with an IR dongle mounted in an out of sight location.

(see parts list overleaf)

AV cables

Amino STBs are equipped with a 10-way, 9-way or 3.5mm analogue output. This allows the specification of various cable configurations to meet specific customer requirements such as SCART and Composite / Component (YPrPb).

(see parts list overleaf)

Debug cable

For qualified service and maintenance personnel or for partner development teams, a USB cable can be specified allowing direct debug and control of the STB from a PC. This cable requires the STB to be opened in case it is retrofitted.

(see parts list overleaf)
