

# AMT Introduces the ARRIS Verified Refurbished E6000® (GEN-1) CMTS Program

**AMT is pleased to announce the availability of the ARRIS Verified Refurbished E6000® (Gen-1) CMTS program.**

This industry leading CMTS solution supports today's most desired technologies, including DOCSIS® HSD, VoIP, IP video, VoD, SDV, and DOCSIS 3.1 in the downstream. The E6000 (Gen-1) platform provides an unprecedented level of density with the ability to easily add additional capacity and additional features in the future. The platform is engineered to support Cable Operators as they grow into the next decade and beyond.

All verified refurbished products come with significant savings and the same standard warranty as new products.

**Have confidence and peace of mind knowing that all E6000 (Gen-1) Verified Refurbished products have been rigorously evaluated, tested and are backed by AMT and ARRIS.**
