

H150

THE LATEST IN IPTV/OTT SERVICES WITH ENHANCED USER EXPERIENCES FOR GUEST ROOMS AND DIGITAL SIGNAGE

The new H150 IPTV device combines all the quality you have come to expect from Amino with a raft of exciting and innovative new features that deliver enhanced user experiences. With a dual core Broadcom SoC delivering more than 2000 DMIPS – and up to 1GB of memory – the H150 offers:

More TV apps, OTT content and services

- YouTube TV – the top ranked online video streaming service on TV with a comprehensive library of user-generated and studio-produced content
- The Amino TV App Store – over 350 “made for TV” apps covering everything from entertainment, news and sport.

More engaging experiences

- Graphically rich user interfaces with smoother and faster transitions alongside improved 2D and 3D graphic effects
- Full HD quality video with support for 1080i60 decode for full screen playback and picture-in-picture (PiP).

More content delivered from anywhere

- Increase the breadth of content that you can offer to your customers. Whether the content is delivered by managed IP, over the open Internet or from the home network – the H150 can seamlessly manage and integrate it all.

Power over Ethernet

Power the set top box using the built-in internal Power over Ethernet (PoE) capability, allowing customers to install H150s where a mains power supply not available

Rugged mountable case

The unit’s robust enclosure incorporates an integrated mounting system that is VESA compliant to attach the H150 to most TVs

CEC control

The H150 provides CEC control over HDMI. This feature allows system integrators to provide an integrated solution with TVs that also support CEC

Serial interface

The H150 is equipped with an RS-232 serial interface that can be used as a connection interface to hospitality televisions for single remote control use

The H150 is fully aligned with all Amino ecosystem partners and the latest digital rights management developments and Verimatrix CA compliance. As with all Amino products you get great reliability – with industry-leading low RMAs, cutting deployment and expensive “truck roll” costs.

SPECIFICATION

System and memory

- CPU Dual Core SoC (2000 DMIPS)
- Memory (RAM) 1GB DDR3
- Memory (Flash) 256MB
- Graphics 3D graphics with Open GL ES2.0

Software

- Operating System Linux
- Browser Opera SDK 3.6
- Middleware SDK or JMACX interfaces
- Security Verimatrix, SecureMedia, Playready

Interfaces

- Ethernet 10/100 BaseT (RJ-45)
- USB 2 x USB 2.0
- HDMI 1.4a with CEC
- RS-232 with TVI
- LEDs 3.5mm A/V jack
- Remote 36kHz IR receiver

Video

- Codecs MPEG-2, MPEG-4 pt.2 (Visual), MPEG-4 pt.10 (AVC/H.264), WMV (VC1)
- Resolution Up to 1080p60
- Picture in Picture Up to 1080i60

Audio

- Codecs MPEG (Layer II), MP3, Dolby Digital (AC3), Dolby Digital Plus, AAC & AAC-HE, WMA

Power

- Mains Power Supply 5V/3A
- Power Over Ethernet (IEEE 802.3af - 2003)
- Power Consumption <12W

General

- Size 102mm x 97mm x 44mm
- Weight 400g
- Operating Temp 0 °C to 40 °C
- Humidity 5% to 95% (non-condensing)
