

The 500 AV Powerline Network Adapter with Four Ports can connect up to four devices right through a power outlet. Based on the latest HomePlug powerline standard, the adapter delivers powerline speeds up to 500 Mbps and 100 Mbps on the LAN Ethernet sides*. It's perfect for high-bandwidth activities like streaming HD video, teleconferencing, or online gaming without any buffering, lag, stalls, or glitches.

Enjoy the high-speed and reliability of a wired connection in the home theater or home office without having to wire a room for Ethernet.

Outstanding Benefits:

- Fast networking speeds (up to 500 Mbps on powerline and up to 100 Mbps on Ethernet*)
- Easy way to extend a fast Internet connection to Ethernet-enabled set top boxes, HDTVs, gaming consoles, wireless access points, and other devices in the home
- Four port design can simultaneously connect up to four individual devices to each other and the Internet
- Ideal for bandwidth-intensive applications such as online gaming and HD video streaming
- Works over the existing electrical wiring in your home
- Safe and secure: doesn't trip circuit breakers, so the signal stays within the home
- Fast and easy...setup in less than 5 minutes
- Complies with the HomePlug AV standard

PWR504 4 Port Unit with the PWR500 Single Access

500 AV Powerline Network Adapters extend fast, wired internet access.

Simultaneously connect multiple devices using the PWR500 with the PWR504 from CATV/IPTV modems to home entertainment devices like Blu-ray players, gaming consoles and smart TVs through electrical outlets with fast connectivity in areas where Wi-Fi signal is non-existent, weak or a fixed Ethernet connection is needed.

Support for Home and Office Devices

- Powerline Network Adapters offer fast Internet connectivity for a wide range of Ethernet enabled home entertainment devices, many of which don't have any other way to connect to the Internet

Extended Internet

- Enjoy extended Internet across your home through any power outlet on the same circuit

Robust Performance

- Get the performance of a wired network without running Ethernet cables
Reduces congestion in Wi-Fi networks

Easy to Use

- These products are truly plug and play, reducing the need for tech support

Secure

- Includes 128-bit AES encryption
