

Delivers a Broader, Stronger, and Faster Wired and Wireless Network

The WPB3000 is a high performance powerline network adapter and wireless extender in one, designed to deliver exceptional network performance and reliability to wired and wireless connected devices throughout the entire home.

Two Products in One

The WPB3000 gives users the best of both worlds:

- Extends wired network through your electrical outlets
- Extends wireless network for fewer dead spots and fewer dropped connections

WPB3000 shown with PWR500

Key Selling Points:

- **Over 2x Faster than Wireless Repeaters**

Wireless repeaters connect to your router and devices simultaneously, so 50% of your bandwidth is already used up before you even start. WPB3000 connects to your router through the electrical wires already in your wall, doubling performance.

- **Eliminates Dead Spots**

Placed away from router, acts as a secondary wireless access point to extend Wi-Fi range.

- **Amplifies Signal Strength**

In addition to increasing range, actually boosts signal strength.

- **WPS Push Button Pairing**

Pairing is done with the push of a button.

- **Broad Device Support**

Works with smartphones, tables, gaming consoles, Blu-ray players, DVR, smart TVs and more.

Why It's Better than a Typical Repeater

Why Wireless Repeaters/Extenders Don't Measure Up

Wireless repeaters connect to your router and devices simultaneously, which means 50% of your bandwidth is already used up before you even start using your applications. And with multiple devices connected on most networks, that's just not enough.

Why WPB3000 is Awesome

Actiontec's Wireless Network Extender + Powerline Network Adapter 500 connects to your router through the electrical wires already in your wall, so none of your bandwidth is taken up unnecessarily. Now you're getting 100% throughput for your connected wireless devices, meaning a faster, stronger connection.

Technical Specifications

WPB3000

Wireless	802.11 b/g/; Up to 300 Mbps
Ethernet	2 x RJ 45 fast Ethernet ports; Up to 100Mbps data rate
Powerline	Homeplug AV, IEEE 1901, up to 500Mbps data rate
Power	100-240 VAC 50/60 Hz, 6.5W

PWR500

Wireless	1 x RJ 45 fast Ethernet ports; Up to 100Mbps data rate
Poweline	Homeplug AV, IEEE 1901, up to 500 Mbps data rate
Power	100-240 VAC 50/60 Hz

Warranty: 1 year limited
