

# Install and Configure Service

**AMT's unique combination of leading distribution capabilities coupled with engineering and professional services delivers your end-to-end solution.**

## Installation and Configuration

It's always important to make sure your new equipment is installed and configured properly. AMT offers installation and configuration services that are customized for your specific needs.

From the installation and testing phase to post-installation review and validation, you'll have the confidence of knowing that your new equipment is reliable and functioning the way you want it to.

### Product Installation Services

Get the peace of mind that comes from having your equipment professionally installed. Our Basic Installation Service includes:

- Inspecting your equipment for any damage that may have occurred during shipment to your site
- Rack design, assembly and installation
- Device installation: racking and onsite custom wiring
- Firmware / Software updating
- Offsite pre-builds - Save time and money: Pre-rack , pre-wire and leverage freight consolidation
- Document installation: Create device signal flow, wiring and rack facial diagrams

### Product Configuration Services

Our service staff has extensive experience with a wide range of technologies and applications to ensure that your equipment is successfully configured into your existing environment. Our Basic Configuration Service includes:

- Working with you to assess your environment and needs through a configuration planning session
- Offer customized configuration services based on your specific needs
- Generate a documentation set detailing configuration services performed
- Testing your equipment to ensure a proper configuration and function using a pre-defined acceptance test procedure
- Hands on operational walk-through / training

**Maximize Infrastructure Investments, Enhance Customer Satisfaction, and Protect your Business with AMT Services.**
