

# MOJO CLOUD PACKAGES

## Enterprise

Mojo Networks cloud managed WiFi is built upon a prolific multi-tenant cloud architecture; Enterprise customers have access to the features and services they need to support high-performing, reliable access, best-in-class security for real-time protection and flexible guest networks.

### Access

- WiFi access management for setup, optimization and monitoring
- Customizable dashboards for visualizing network statistics
- Graphical troubleshooting and remote packet capture
- Event and report management

### Security

- Industry-leading wireless intrusion prevention system
- Fully-integrated scanning and access control
- Most accurate detection system built upon proprietary behavioral techniques
- Automated compliance and security reporting

### Engagement

- Support for guest network capabilities
- Custom splash page design
- Multiple authentication plugins including social media, web form, credentialed access and more
- WiFi, Social and Zone-based analytics

## Enterprise Elite

In addition to everything listed above, Enterprise Elite customers gain access to the latest WiFi engagement platform. This grants access to unprecedented methods to talk to, and with, individual WiFi users while they connect and browse.

### Advanced Splash and Landing Page Capabilities

- Brand new templates for designing beautiful, interactive splash pages and landing pages
- Access to two new plugins - Video and Poll - for WiFi users to connect through
- New widgets including embedded video, polls, App download, Apple Passbook, image carousels and more

### SMS/MMS Interception

- Automatically send SMS/MMS in response to WiFi users' web traffic
- Design custom MMS images using Mojo Canvas and create custom SMS messages
- Visualized analytics of web traffic and engagement across time and location

### In-Browser Engagement\*

- Design custom campaigns that support persistent messages within WiFi users' browser
- Develop passive banners that link to custom content
- Create and customize overlays that display videos, polls and more
- Target your messages at any scale across your organization
