

# The Amino world of Enterprise

# Video Delivery To Screens Anywhere

Video is communication. Video is storytelling.  
Video is everywhere.

Enabling reliable video delivery, to screens in all kinds of environments, is at the core of our Enterprise solutions. Whether it is the TVs distributed throughout sports stadiums, in hotel rooms or in medical waiting rooms, businesses are using video to inform, entertain and educate.

Enterprise solutions must provide the flexibility to address a wide variety of deployment scenarios. Media players must be designed for “out of sight” operation, while also providing capabilities such as power-over-ethernet for those environments with limited or inaccessible power outlets.

Retail shops need video to be displayed in both landscape and portrait formats. Government and military organizations demand security, reliability, and dependability. Each situation requires integration between different video and other content management systems, the media player and the display.

For decades, Amino enterprise devices have been deployed in a wide range of environments.

## Government and Military

Amino devices have been in the “room where it happens” enabling real-time viewing of aerial reconnaissance and security operations

## Residential

Amino media players enable residents of university halls, hospitals and prisons to enjoy entertainment content in common and private areas

## Betting

Amino media players and software enabling and ensuring live sport video delivery to TVs in betting shops

## Corporate Video

Amino facilitating in-house video delivery and consumption

## Hospitality

Amino enables devices with PoE to simplify installs in hotel rooms around the globe

## Stadiums

Our media players makes sure fans don't miss a second of the event with high quality video and graphics

## Point-of-Sale and Information Services

Amino media players powering video and advertisement services at POS counters and providing real-time information services within transportation hubs

## Enterprise in the Community

Amino solutions connects communities to all the video they need, whether they are on oil rigs, at the south pole, in a doctor's surgery or on a cruise ship or aircraft

# End-To-End Value

Amino's Enterprise solution fulfills expectations for reliable technology with incremental value simplifying deployment, set-up, use and customization.

It starts with simplifying installation. Our straight forward self-install wizard, reduces deployment time. This provides unique value to smaller businesses that may not have employees with technical expertise.

Once deployed, any business with the goal of delivering live channels can easily configure channel line-ups using the built-in zapper application. The zapper provides flexibility to customize the UX with support for both RTL and LTR orientations.

Amino's Enterprise Solution also provides customers with the option to develop their own Native or Browser based application using the H200 software development kit (SDK). The open development platform can be easily customized for integration with partner technology and deployment in a wide range of scenarios.

Unique value is provided by Amino Engage, our cloud-based platform for device management. This enables businesses with widely deployed devices to have a centralized view of all devices and to accelerate their ability to identify, diagnose and remotely rectify any issues. It can also be used to create, deliver and push channel line-ups to devices in real-time.

# Built Upon A Reliable Foundation

The core of our Enterprise solutions is the Amino H200. It ticks all the boxes, providing the high-quality experience expected, while delivering the required functionality and flexibility.

**Key features include:**

- AVI/HEVC 4Kp60 high quality video
- Eliminate power cords with Power-over-Ethernet
- VESA compliant, Tamper-proof, ruggedized chassis
- Open platform for custom technical development

## A Powerful Ecosystem

Delivering video solutions to the enterprise market requires strategic partnerships.

Our platform and its SDK are easily integrated with our partners' go-to-market solutions, giving them the flexibility and dependability required for a wide range of deployment scenarios.

Distribution partner

## Our Enterprise solutions deliver:

**Flexibility**

Devices deployed in a wide range of environments

**Security**

Media player compliant with 802.1q VLAN

**Extendability**

To easily customize the open development platform
